docs.google.com

HOUSTON SHELTER AVAILABILITY

HERE IS HOW YOU CAN HELP:

Attention: Google is limiting the number of people who can edit the spreadsheet at one time, as a result, we have to lock down the spreadsheet to only up to 50 'approved editors'. If you have been working on this sheet already, please slack me on the Sketch City slack @neeraj or @izzylee (Yulan) or email neerajtandon25@gmail.com. If you are just arriving and interested in contributing, please submit new information on this form:

INSTRUCTIONS FOR PEOPLE CALLING

Call shelters on the "Shelters" tab of this spreadsheet.

--> Please prioritize shelters that haven't been updated today

http://tinyurl.com/harveysheltervolunteer

Shelters that have not been updated today will have a "yellow" last-updated time. Please call those shelters first, and have the shelter update google form up.

Select "update shelter info" on the google form, and then fill in as much of the information as possible while on the phone. Most critical information: shelter name, address, phone number, and whether or not they are currently accepting people. For locations taking only donations, please add information to the "Needs" tab.

A sketch city volunteer will transfer your form submission into this master google spreadsheet. Thank you!

INSTRUCTIONS FOR SKETCH CITY DATA CURATORS

Transfer data from raw form responses to update/add to Shelters or Needs

TRANSFER THE DATA FROM: http://tinyurl.com/harveyshelterformresponses to either "Shelters" or "Needs" sheet here

Make sure to leave your name and a timestamp

Update the spreadsheet according to the below codes:

no one is coming
IT'S UP TO US

We are very sorry for the loss you have experienced.

Below, please let us know your **immediate** needs and how we can help provide some relief. Please give as much information as possible. This helps us match you with assistance.

Tell us how we can help...

Be specific! Make sure to tell us if any of these apply:

- Do you need help in Spanish or another language?
- Do you need medical supplies (including glasses, contacts, medication, etc.)?
- Are you handicapped or are you caring for someone with special needs?
- Do you have dependents or require financial assistance?

Here's how to contact me...

“**Our planet is facing the greatest problems it's ever faced, ever.** So whatever you do, don't be bored, this is absolutely the most exciting time we could have possibly hoped to be alive.

And things are just starting.”

WHAT CAN A TECHNOLOGIST DO ABOUT CLIMATE CHANGE?

(A PERSONAL VIEW)

BRET VICTOR / NOVEMBER 2015

This started with a tweet. I'm embarrassed how often that happens.

Frustrated by a sense of global mispriorities, I blurted out some snarky and mildly regrettable tweets on the lack of attention to climate change in the tech industry (Twitter being a sublime medium for the snarky and regrettable). Climate change is the problem of our time, it's everyone's problem, and most of our problem-solvers are assuming that someone else will solve it.

I'm grateful to one problem-solver, who wrote to ask for specifics —

Bret Victor @worrydream · Aug 11
Worrying about sentient AI as the ice caps melt is like standing on the tracks as the train rushes in, worrying about being hit by lightning

Bret Victor @worrydream · Aug 12
If any "founders" out there want to "disrupt" our 401 ppm atmospheric CO2, or "moonshot" ocean acidification, that would be cool

Bret Victor @worrydream · Aug 12
"minimum viable planet"

> *"How do you think the tech community (startup community, or any community) can contribute to tech and/or policy solutions on a global scale?"*

Azure for Research Award: AI for Earth

Program details

Region: Worldwide

What it is

The Microsoft Azure for Research program awards cloud computing resources to researchers working on data-intensive projects, specifically Azure Analytics services.

Submit your proposal

1. Review the application instructions
2. Use the online application form (include "AI for Earth" first in the title)
3. Submit on or before **October 15, 2017**

Contact us

If you have questions about the awards program or the application process not answered in the FAQ, please email us at azurerfp@microsoft.com.

About Tools

In collaboration with Esri's outreach team, the Microsoft AI for Earth program awards advanced Microsoft Azure cloud computing resources and powerful Esri GIS tools to researchers working on environmental and conservation programs aimed towards transforming the way we are currently managing complex environmental challenges.

These awards are intended to drive exploration and discovery by providing innovative data science, spatial analysis, and visualization tools to organizations that are focused on finding solutions to climate change, loss of biodiversity, agricultural cost and yield, and increased water scarcity. Learn more about environmental sustainability at Microsoft.

Areas of focus

AI for Earth program activity is focused on four areas that are vital for building a sustainable future:

- **Agriculture:** To feed the world's rapidly growing population, farmers must produce more food, on less arable land and with lower environmental impact.
- **Water:** In the next two decades, demand for fresh water—for human consumption, agriculture, and hygiene—is predicted to dramatically outpace supply.
- **Biodiversity:** Species are going extinct beyond the natural rate by orders of magnitude, driving the decay of key ecosystem services, like pollination, that humans depend upon.
- **Climate change:** An increasingly variable climate—extreme weather events, rising sea levels, higher global temperatures, and increased ocean acidity—threaten human health, infrastructure, and the natural systems we rely on for life itself.

Application instructions

http://aka.ms/save_the_world

Thanks!

http://aka.ms/save_the_world

@DynamicWebPaige

Getting Started

"The goal of our efforts is to see governments [and] nonprofits use data to improve what they do," said DSSG Director Rayid Ghani at the group's annual conference in Chicago last month. "Data is not going to give them all the answers, but it will help them improve."
